COMPREHENSIVE CLOUD SERVICES

Cloud technology is a powerful combination of computing, networking, storage, management solutions, and business applications

The PACISOFT Cloud Solutions team provides a range of custom and packaged solutions focused on messaging, collaboration, data protection, infrastructure, IT tools and private clouds. Our team is adept at helping you understand the key characteristics and benefits of public, private and hybrid cloud solutions, and will guide you to the one that suits you and your infrastructure best. Virtualization creates opportunities for your organization to consolidate computing resources to streamline IT management while improving availability, security and utility. The reduced data center footprint enabled by virtualization provides the added benefits of lower power, cooling and space costs.
