SECURITY FOR MAIL SERVER
Keep your corporate mail system free of spam and malware

Email has become a major channel for malware distribution. Virus outbreaks cause companies significant financial damage by undermining the integrity and confidentiality of their information. In addition, companies face considerable losses due to employees needing to delete hundreds of unwanted messages from their mailboxes each day. The extra traffic caused by such unwanted mail has to be paid for too.

Kaspersky Security for Mail Server is a High Value solution from Kaspersky Lab that is easy to install and use. It effectively protects traffic running through mail and groupware servers from the latest malware and spam.

The solution includes refreshed applications that ensure the security of all popular mail servers, including Microsoft® Exchange, Lotus® Domino®, Sendmail, qmail, Postfix, Exim and CommuniGate Pro. Kaspersky Security for Mail Server can also be used to set up a dedicated mail gateway and works seamlessly in even the most complex heterogeneous infrastructures.

KEY BENEFITS

PROTECTS MAIL SERVERS AND COLLABORATION PLATFORMS
Kaspersky Security for Mail Server works to protect mail on the latest versions of major mail and collaboration platforms, including: Microsoft® Exchange, IBM Lotus® Domino® (installed on Windows® or Linux platforms) and Linux-based mail servers.

REDUCES TRAFFIC LOAD
Intelligent spam filtering significantly reduces traffic load in your organization.

OPTIMIZE SYSTEM RESOURCES
A new antivirus engine, load balancing of server resources, optimized antivirus scanning technology and the option to exclude specified objects from scanning increase performance and reduce the resources needed to perform antivirus scans.

CONTROL WITH EASE
Simple, user-friendly management tools, information on mail protection status, plus flexible settings for scans and reporting give you efficient control of your mail and document security.

STAY UP TO DATE
Frequent database updates mean proactive protection against the very latest malware and spam, while enhanced performance efficiency means you get the protection you need with less system resource usage.

ENSURE EFFICIENCY
Kaspersky Security for Mail Server's reliability and high performance ensure uninterrupted operation and effective execution of your company's business processes.

SUPPORT FOR VIRTUALIZATION
VMware Ready certification ensures proven reliability for virtual environments.

HIGHLIGHTS

- Award-winning anti-malware engine
- High performance cloud-assisted anti-spam engine
- Consistently excellent detection rates, validated by third-party test organizations
- Broad-based protection for heterogeneous enterprise environments
- Superior performance with minimal system resource utilization
- Flexible management and easy administration helps to reduce Total Cost of Ownership
- World-class trusted, fast and responsive global support

PROTECTED POINTS
- Microsoft® Exchange Servers 2003, 2007, 2010
- IBM® Lotus® Domino® (v. 6.5, 7.0, 8.0, 8.5)
- Linux-based mail servers: Sendmail, qmail, Postfix, Exim and CommuniGate Pro

PRODUCT FEATURES

EFFECTIVE ANTI-MALWARE AND ANTI-SPAM PROTECTION
- Support for current versions of Microsoft® Exchange Server and IBM® Lotus® Domino®
- Support for Sendmail, qmail, Postfix, Exim and CommuniGate Pro mail servers
- Real-time anti-malware protection
- Efficient protection against spam — the new anti-spam engine blocks more than 99% of unwanted email
- Real-time protection against advanced persistent threats and unknown exploits with ZETA Shield (Kaspersky Security for Linux Mail Server only)
- On-schedule scanning of emails and Lotus Domino databases
- Cloud-assisted Scanning of all messages for spam on the Microsoft® Exchange server, including public folders, using the Kaspersky Security Network
- Enforced anti-spam updates service supporting Microsoft® Exchange Server 2007 clusters and DAG for Microsoft® Exchange Server 2010
- Scanning of messages, databases and other objects on Lotus® Domino® servers
- Optimized usage of system resources
- Filtration of messages by attachment type
- Easy and convenient anti-malware and anti-spam database update process
- Backup storage of data prior to disinfection or deletion
- Scalability and fault tolerance
- VMware Ready

ADMINISTRATION

- Easy installation, flexible management and regular updates
- Role-based administration
- Product status notification system
- Comprehensive reports on network protection status

How to buy

Kaspersky Security for Mail Servers is included in Kaspersky Total Security for Business.

Kaspersky Security for Mail Server can also be purchased separately. Contact your reseller for details and pricing.
